

Pak-Mor Limited produces a wide range of refuse collection vehicles. Please contact us to discuss which model may best suit your particular needs.

REAR LOADERS:

RBS100 (Bandit): Available in 6, 8, and 10 cubic yard body configurations for close quarter residential applications.

R100B: Available in array of body configurations from 12 to 30 cubic yards for residential and light commercial applications. "The workhorse of refuse collection." Also available in low profile (RLP), narrow (RN), and enhanced compaction (RC) versions.

R200B: Midsize, versatile gate well suited to almost any application. Available with body sizes ranging from 16 to 30 cubic yards, optional enhanced compaction (RHC) and demolition package (RNY) as well. "An economical municipal machine that does it all."

R300B: Large high compaction commercial gate can be configured with 20, 25, and 30 cubic yard bodies. "The Beast of the East."

RECYCLE BODY:

RDG: 40/60 Split Gate Rear Loader for Recycle and Comingle Applications. Available with 20, 25, and 30 cubic yard bodies.

FRONT LOADER:

FPE800C: Durable light weight full eject Front Loader with a heavy punch. Available in 30, 35, and 40 cubic yard configurations.

COMMERCIAL SIDE LOADER:

HLR: For those who handle commercial side load containers, the Pak-Mor HLR is "the benchmark and obvious choice." Available in 24, 29, and 33 cubic yard body configurations.
