

Mechanic Truck by Stellar Industries offer the most complete turnkey packages available with a heavy duty steel body, air compressor, drawer system and available options.

- **Air Compressors**

Stellar Industries has chosen to use the American Eagle truck accessories and air compressor systems as they are the most dependable, most rugged and trouble-free air compressors and products available in the North American market today! Like our service trucks, the American Eagle products are built to the highest standards demanded of all Stellar products.

- **Heavy Duty Drawer Sets**

American Eagle mobile service drawer assemblies are built to take the abuse. The 500 lb. slide is used across the entire size range of drawers to insure a solid, durable platform to carry your tools and components. American Eagle is so confident in the durability of these drawers that we are offering a full lifetime warranty on the slides and hardware.

- **Remote Control**

Stellar Industries was the first U.S. manufacturer to include the state-of-the-art fully proportional multi-functional remote control as a standard feature. The radio remote incorporates a variable speed trigger that allows the operators to feather the crane with precise control. Additionally, the radio remote control handle features engine start/stop functions, compressor on/off, engine speed controls, and an emergency shut-off.

- **Power Packs**

Market research and consumer demands has prompted Stellar Industries to develop the Powerhouse 24 hydraulic power supply. This unit allows the operator to manipulate the crane or other hydraulic equipment* with or without the chassis engine running or when a pump and PTO is not applicable.
