

## C550c HUNTER BASE STATION

### **COMPACT. RUGGED. FIELD-READY.**

The CUES C550c Hunter Base Station is built for performance and portability. Designed to fit seamlessly into an ATV, van, pickup truck, or trailer, the Hunter allows operators to access easements and hard-to-reach areas with ease.

Featuring the powerful C550c controller, the Hunter puts control at your fingertips, making survey creation faster, easier, and more efficient than ever before.

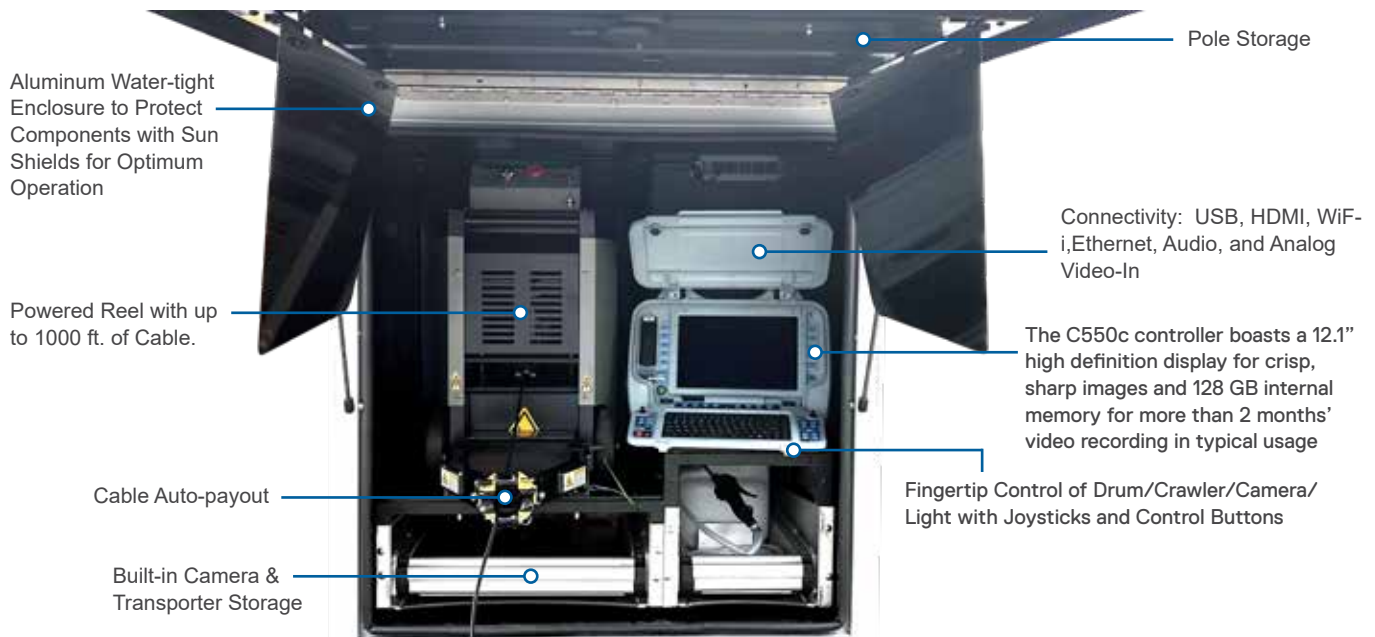

## WHY CHOOSE THE CUES HUNTER BASE STATION?

### **Operator-Focused Control -**

- C550c controller with a 12.1" high-definition display delivers crisp, detailed imagery.
- 128 GB of internal memory, store up to two months of video recordings (typical usage).
- Connectivity options include USB, HDMI, Wi-Fi, Ethernet, audio, and analog video-in.
- Joystick and button controls for fingertip management of the drum, crawler, camera, and lighting.
- Intuitive menus and function buttons streamline surveys so you can move quickly from job to job.

### **Flexible Inspection Options -**

- Choose from manual or powered cable drums, each offering up to 1,000 feet of cable with auto-payout capability.
- Three interchangeable cameras and two powerful crawlers handle a wide range of inspection challenges.
- A selection of wheels, elevators, and tires allows inspection of pipe sizes from re-lined 6" up to 60".
- Compatible with pushrod cameras to expand inspections to pipes as small as 1.5 inches.

#### Smart Software Integration -

- Built-in reporting templates ensure compliance with multiple standards and enable reports to be shared instantly upon survey completion.
- Fully compatible with CUES's GraniteNet Software for seamless data management, task tracking, and informed asset decisions.

### WHEN YOU'RE ON THE HUNT FOR PORTABILITY AND PERFORMANCE

The CUES C550c Hunter Base Station delivers the perfect balance of rugged design, intelligent control, and flexible operation, empowering you to tackle inspections in any terrain or environment.
