

CURRAHEE 2.0 LATERAL REINSTATEMENT CUTTERS

SIMPLICITY. DURABILITY. PRODUCTIVITY.

Engineered to deliver power and precision, the CUES Currahee Cutter 2.0 is designed for reinstating wastewater service laterals, removing protruding taps, and brush-finishing cuts with ease. Currahee includes a rugged 2.0 hp air motor, providing the torque and smooth cutting performance needed for 5.25" - 12" (133 mm - 305 mm) relined pipe applications.

Whether you're clearing blockages, trimming roots, or reinstating laterals in a CIPP liner, Currahee delivers results that keep your pipeline rehabilitation projects moving forward.

WHY CHOOSE THE CUES CURRAHEE CUTTERS?

 VARIETY OF BITS AVAILABLE

 WATER BLOW-OFF & WIPER

 CURRAHEE CUTTER CAMERA

 OPTIONAL PARTS AVAILABLE

One Controller. Endless Possibilities.

The Currahee Cutters operate seamlessly with the same CUES gamepad controller that powers our mainline inspection, side-scanning, lateral-launch, and grouting equipment, making operation intuitive, efficient, and consistent across your CUES systems.

Applications

- Reinstating laterals in CIPP liners
- Removing protruding taps
- Clearing roots and debris
- Brush-finishing reinstated cuts

Additional Features/Options

- Dual forward-facing cameras
- Variety of bits available
- Water blow-off & wiper system
- Optional replacement parts

CUSTOM CUTTER VEHICLES

Take productivity on the road with a CUES custom-built CCTV/Cutter truck or trailer, fully outfitted for lateral reinstatement, tap removal, and inspection tasks.

- Box trucks, step vans, or trailer-mounted options
- Export-ready dry freight box builds
- Self-contained units with optional lateral launch or grout systems
- Onboard or tow-behind compressor options
- Performs optimally using 1000'- 1500' (305 m - 457 m) of cable

Upgrade your pipeline rehabilitation with the power, durability, and simplicity of the CUES Currahee Cutters. Call today for a free demo!
