

KANGAROO CUTTERS LATERAL REINSTATEMENT

**RUGGED.
RELIABLE.
READY FOR ANY CHALLENGE.**

REINSTATE SERVICE LATERALS WITH POWER AND PRECISION -

CUES's Kangaroo Cutters are engineered to withstand the toughest conditions of pipeline rehabilitation. Designed for use after pipe lining, these cutters quickly and effectively:

- Re-open service laterals into relined pipes
- Remove protruding laterals and roots
- Prepare mainlines for long-term reliability

WHY CHOOSE THE CUES KANGAROO CUTTERS?

Flexible Configurations -

CUES offers truck- and trailer-mounted cutter systems to meet your needs:

- High Cubes, Step Vans, and Medium-Duty Chassis
- Export-ready dry freight box units
- Joint and lateral sealing equipment options
- Onboard or tow-behind compressor setups

Optional Upgrades -

- Desktop control unit
- Protruding lateral cutter attachments
- Air hose reel with speed control & automatic level wind
- Pipe extenders for added reach

TWO MODELS TO TACKLE ANY JOB

Giant Kangaroo Cutter -

- For 12"–30" (305–762 mm) diameter relined pipe
- Ideal for reinstating services and removing protrusions

Small Kangaroo Cutter -

- For 6"–12" (152–305 mm) diameter relined pipe
- Low-profile skids for tight spaces
- .9hp air motor for powerful, smooth cutting

Dual Kangaroo Cutter Controller

One controller, total control; operates both cutters with:

- 6-direction movement (in/out, rotate, up/down)
- Adjustable speed with rotary potentiometer
- Amps display for precise monitoring
- Integrated air motor/clamp ON/OFF

Proven Performance –

Operates flawlessly in CIPP or Fold-and-Form liners

Versatile Compatibility –

Works with most CCTV inspection systems

Rugged Construction –

Waterproof, shock-resistant, and built for everyday use

Full Control –

Dual Kangaroo Cutter Controller provides precision in every direction
