## TMAX™ 1

With extensive crane compatibility and customization options, TMAX 1 Mechanic Trucks have a wide range of applications covered. The aluminum construction provides corrosion resistance for years of hard work and reliability, and the quality is apparent in every element from the engineering to the materials to the precision construction.

# ADDITIONAL INFORMATION

## New Features for 2025 TMAX Models:

- Mounting rails integrated within compartments allow for fully customizable configurations.
- Ease of wiring access with added pre-drilled holes between compartments for seamless wiring installation.
- Easily add a wide range of mechanic service truck accessories, like bale-handle drawer sets and bolt bins for better organization.
- Hydraulic reservoir design features a top-mounted filter for easier maintenance.
- Simplified back-end design minimizes welded holes on the truck body for improved performance.
- Mudflaps positioned to wire guards to avoid interference with exhaust systems.

## Proven Performance:

- Available in either 9', 11', or 13' bodies.
- Stellar's torq-isolator crane support design isolates the crane compartment from the rest of the side pack.
- Lifting stresses are transferred to the stabilizers and box-type subframe, not the compartment doors.
- Aluminum extruded top with drill-free mounting rails make it easy to add a wide range of mechanic service truck accessories.
- Aluminum sidepack and doors reduce weight and corrosion, allowing for more payload and longer life.
- Bodies feature a 21" steel workbench bumper with an integrated full-width long bar storage compartment and vise mounts.
- Roller-type boom support helps center the crane boom when stowing.
- Stainless-steel billet-style hinges have hidden fasteners and a rugged 5/16" stainless-steel rod for years of heavy use.
- Rotating master-lock system for security.
- Exterior mounted light box provides easy mounting for work lights and other accessories while minimizing entry points into the body.
- 3-point compression latches keep weather-stripping tight while allowing easy access.
- Double-panel 1/8" aluminum tailgate with hinged arm brackets provides a stout working surface.
- 250-lb capacity, adjustable divider shelves made of spangled galvanized steel.
- Complete undercoating, with minimum of 6.5 mils of petroleum base material, provides extra protection from corrosion and road debris.
- Easily add a wide range of mechanic service truck accessories.

## Models

- TMAX 1-9
- TMAX 1-11
- TMAX 1-13

## Works with CDTpro™ Control System

Several cranes compatible with the TMAX 1 feature the new [CDTpro Control System](#). Its innovative, industry-only Range Finder™ technology provides real-time max lifting capacity from any point as you walk around the crane.
