TMAX™ 3

For servicing big fleets in demanding industries, such as heavy equipment, mining and construction, you need a mechanic truck with a bring-it-on attitude. That's the TMAX 3. Quality-built with the latest engineering, top materials and precision assembly, TMAX 3 Mechanic Trucks can handle the daily – and weekly, monthly and yearly – grind in the toughest working conditions.

TMAX™ 3 TANDEM AXLE ALUMINUM NOW AVAILABLE

ADDITIONAL INFORMATION

Both single- and tandem-axle TMAX 3 models feature aluminum construction for corrosion resistance and increased payload. For added capabilities and convenience, the crane pedestal/compartments is constructed of steel material capable of handling the robust lifting capacity of Stellar's [14530 crane](#) while providing the same storage space as other, non-reinforced compartments.

New Features for 2025 TMAX Models:

- Mounting rails integrated within compartments allow for fully customizable configurations.
- Ease of wiring access with added pre-drilled holes between compartments for seamless wiring installation.
- Easily add a wide range of mechanic service truck accessories, like bale-handle drawer sets and bolt bins for better organization.
- Hydraulic reservoir design features a top-mounted filter for easier maintenance.
- Simplified back-end design minimizes welded holes on the truck body for performance.
- Mudflaps positioned to wire guards to avoid interference with exhaust systems.

Proven Performance:

- Available in either 14' or 17.5' bodies.
- Stellar's torq-isolator crane support design isolates the crane compartment from the rest of the side pack.
- Lifting stresses are transferred to the stabilizers and box-type subframe, not the compartment doors.
- Aluminum extruded top with drill-free mounting rails make it easy to add a wide range of mechanic service truck accessories.
- Aluminum sidepack and doors reduce weight and corrosion, allowing for more payload and longer life.
- Bodies feature a 26" steel workbench bumper with an integrated full-width long bar storage compartment and vise mounts.
- Roller-type boom support helps center the crane boom when stowing.
- Stainless-steel billet-style hinges have hidden fasteners and a rugged 5/16" stainless-steel rod for years of heavy use.
- Rotating master-lock system for security.
- 3-point compression latches keep weather-stripping tight while allowing easy access.
- Double-panel 1/8" aluminum tailgate with hinged arm brackets provides a stout working surface.
- 250-lb capacity, adjustable divider shelves made of spangled galvanized steel.

- Complete undercoating, with minimum of 6.5 mils of petroleum base material, provides extra protection from corrosion and road debris.
- Easily add a wide range of mechanic service truck accessories.

Models:

- TMAX 3-14
- TMAX 3T

Works With CDTpro™ Remote

The [14530 crane](#) can be used with the [CDTpro remote](#). Its innovative, industry-only Range Finder™ technology provides real-time max lifting capacity from any point as you walk around the crane.

SPECIFICATIONS

	TMAX 3	TMAX 3T
Applicable Chassis:	33,000 GVWR and up	54,000 GVWR and up
