

Bayne's state-of-the-art cart lifting capabilities provide a great opportunity to reduce your trash handling cycle times while reducing workplace injuries. Every Bayne Premium Lift Systems product is designed to deliver cycle times from 6 to 12 seconds, depending upon application needs.

Our products are divided into two categories: **Mobile Refuse Products** and **Commercial / Industrial Products**

### Mobile Refuse Products

Known for our Thinline® lift with rack and pinion actuator, Bayne is the industry's leading supplier of cart tipplers and carry cans. Our diverse line of lifters for mobile refuse trucks is second to none, providing the most reliable solution to your waste handling needs. We have lifters that work with almost any application or budget.

### Commercial / Industrial Products

Bayne's BEST series of commercial and industrial lifters offers a complete line of products designed for use in factories, hospitals, shopping centers, food processing plants, post offices, universities, and many other material handling applications. Our commercial and industrial lifters are designed specifically to enhance worker safety. These lifters can safely and quickly perform the workplace tasks that cause the greatest strain on your employees' backs and shield them from hazardous and other waste contamination

Bayne's actuated lifters for mobile refuse applications feature the patented Thinline® rack and pinion rotary actuator for superior lifting capacity and outstanding reliability. These products are specifically designed to improve the efficiency of your refuse collection operation and minimize your fleet downtime. Our diverse line of lifters for mobile refuse trucks is second to none, and we have models that work with almost any application and budget.

- MBTL Series
- Compatible with standard domestic style 2-bar roll-out carts
