

The Most Reliable Rear-Loader in the Industry.

Body Floor – ¼" floor sheets along with 5/16" floor trough make this the thickest standard floor in the industry. The unique trough design forms a natural sump which holds up to 300 gallons of liquid.

Maximum Capacity. Super Productivity.

One of the largest hopper capacities in its class, leading to more efficient operation by reducing the number of cycles needed to sweep the hopper. The packer/carrier panel design allows workers to continue loading trash into the hopper while running the hopper sweep cycle. The packer/carrier will not push trash out of the hopper during the sweep cycle.

Enhanced Engineering. Maximized Performance.

The curved shell body design features single-piece side and roof sheets – no seams. Stronger, cleaner looking. Packer/ Carrier rides on rollers instead of sliding blocks for less friction and wear.

Increased Compaction. Maximized payload.

Diamond Force Compaction design on the push out panel evenly distributes the trash during packing and minimizes voids in the payload. Compaction Rating is 1000+ lbs per cubic yard.

Versatile unit. Optimized TCO.

Interchangeable cylinders – Leach is the only rear loader to have interchangeable packer and carrier cylinders. Reduces the types of cylinders needed for inventory and maintenance.
