

Clean Curved Ejection Blade The curved ejection blade rides on "UHMW" polyethylene wear shoes. Blade guides are closed channels welded to the inside body sidewalls, up above the dirt and grit which can accumulate on the floor, for extended shoe life and low maintenance.

Simple Hydraulic Controls Controls are located in a comfortable location, mounted in machined "UHMW" polyethylene, for a more smooth wear resistant vibration dampened operation.

Body Side Door The *Clite* side door provides a large convenient maintenance access. The attractive contoured door has large grab handles to help enter and exit the compactor body. Side door access ladder provided.

Rugged Compaction Blades Elite The strong, clean, rugged design of the blades are also the easiest in the industry to remove and maintain. Loadmaster engineers designed the blades to run on large aluminum bronze or "UHMW" guide shoes for minimal wear and long life.

The Clife Productive Hopper Size hopper features a solid one-piece smooth design, of exceptional toughness. The hopper material is 150,000# minimum yield, high strength, "T-1" steel.

Tailgate Locks Loadmaster offers automatic hydraulic tailgate locks. Our tailgate cylinders have large oversize push rods, with built in restrictors to slow the drop speed of the truck tailgate. The tailgate seal is a tough 70 durometer.

Exceptional Wiring Loadmaster believes it has the finest wiring in the industry. All main connectors are "aircraft" type. Each wire has its function printed along the entire length of the wire, enclosed in a breathable, protective, heavy nylon loom covering. Your mechanic should not have to go back and forth with a voltage meter. Certain optional accessories are provided for in each loom.

Smooth Body Side Walls The Clite utilizes clean curved pre-stressed body side walls. Your logo will display beautifully, your maintenance staff will love to clean it, your customers will admire it. Elimination of the old style vertical rib reduces rust's ability to destroy the vehicle's strength and appearance.

Technologically Advanced Cylinders Loadmaster utilizes the most advanced design available in its hydraulic cylinders. We take great pride in the technology and components from which our cylinders are constructed. Call and ask us for a complete description.
